WINFIELD®
UNITED
South Africa

our seed your advantage

InteliSeed offers specialised seeds and seed care solutions through dedicated and qualified Seed Specialists and Representatives in a nationwide network in South Africa.

We are in the favourable position to supply all our growers, processors and nurseries with high-quality material, the best genetics and disease treated packages.

InteliSeed's product portfolio is strengthened by incorporating various suppliers covering all crops throughout South Africa. This secures constant introduction of new genetics in the vegetable and sunflower seed sectors.

A combination of products, skills, technology and expertise through specific programmes and applications is offered to help ensure sustainable agriculture.

- Seeds and seed treatment expertise
- Latest genetic material
- Screening, testing and evaluation of potential varieties
- Trial sites in different geographical regions of South Africa
- Specialising in tested varieties of:
Maize, vegetable, oilseeds (sunflower & soybean), cover crops and pasture seeds
- Specialist technical advice and support
- Professional Seed Specialists

Through the integration with InteliGro Crop Solution Specialists, the InteliSeed Seed Specialists promote an integrated crop offering with specialist focus, while remaining complementary towards the objective of optimised output and quality.

TRIAL SITES

InteliSeed invested in the combined Intelekt Solutions trial sites, together with InteliGro, to verify certain suggested solutions and to provide the opportunity to test different products and programmes to the benefit of our clients.

This programme supports our ambitions to bring new genetics to South African producers. These scientific trials support our technical advice and keep us a leader in the industry.

We have trial sites in different areas to supply the very best information, with more trial sites that are planned in the future.

high yield

Maize Seeds

We supply a range of leading white, yellow and green maize seeds to maximise farming profitability.

Vegetable Seeds

We focus on the trustworthy recommendation of seeds genetics for higher yielding crops and for better quality food.

Oil Seeds

SUNFLOWER SEEDS

We continuously screen new genetic material from Agricol to offer cultivars that are well established with high oil content, high yield potential and excellent area adaptability.

SOYBEAN SEEDS

We are the national distributor of the Soyield range cultivars from SHS, with tested cultivars commercially available. We have distribution rights with Agricol for a complete range.

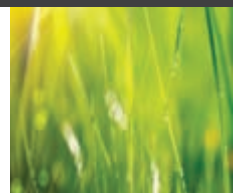

CANOLA SEEDS

Agricol is our main supplier of Canola seeds for our seed offering in different areas.

Pasture Seeds

We supply pasture seeds from a range of unique seed varieties that have the potential to bring about a total revolution in grazing and land use in South Africa.
